PERSONAL PROJECTS

•Resident Evil Inspired Portfolio Website (In Development) | [Link](#)

Designed and developed an immersive personal portfolio featuring responsive layouts and interactive animations.

- Built a custom UI inspired by survival-horror aesthetics while maintaining accessibility and usability.
- Showcases development projects, design work, and technical skills through modern web technologies.
- Technology Used : Next.js, TypeScript, Tailwind CSS, Figma.

•Leon - Intelligent Workout Tracking & Analytics App (In Development) | [Link](#)

Built a modular Flutter application with Supabase backend for workout logging and analytics.

- Implemented offline-first architecture using Hive and Riverpod for reliable state management.
- Integrated AI-assisted workout insights with real-time synchronization.
- Technology Used: Flutter, Dart, Riverpod, Supabase, Hive.

•Personal Graphic Design & Content Creation Portfolio | [Link](#)

Created visual content and branding assets across YouTube, social media, and digital marketing platforms.

- Designed 100+ YouTube thumbnails, posters, banners, and promotional creatives, focusing on visual hierarchy, typography, and audience engagement.
- Produced video edits, branding assets, and marketing graphics using Adobe Creative Suite and Figma while maintaining consistent visual identity across projects.
- Technology Used: Photoshop, Illustrator, Premiere Pro, Figma, Canva

EXPERIENCE

•Research Student (Independent Project) - CampusQuest | [Link](#)

May 26 - Present

Under Prof. Kalpana Shankhwar, Indraprastha Institute of Information Technology Delhi (IIIT Delhi)

Offline

- Developed CampusQuest, a Unity-based campus navigation system, contributing to UI/UX design, 3D environment creation, texturing, terrain design, and user flow planning.
- Implemented C navigation logic, teleportation, directional guidance, and physics-based interactions, while optimizing assets and refining the experience through iterative testing.

•Brand Design Assistant (Project Based) | Vidyut Systems

May 26 - Present

Collaborated in a 3-member team to redesign the visual identity of an electronics manufacturing company.

Offline

- Designed logos, typography, color palettes, brochures, and brand assets while contributing to a unified visual identity system.
- Collaborated with teammates and stakeholders to create marketing collateral and brand guidelines for digital and print applications.
